

X-431 PAD III V2.0 is the high-end diagnostic equipment newly launched by Launch, integrating the Launch excellent diagnostic technology and made many improvements and innovations. It has deeply optimized the system layer, greatly improved the system response speed, and optimized the user experience.

Improvements

- Optimization of Operation
- Optimization Diagnostic Application enhance operation fluency and the higher data stream refresh speed
- Preset Tool Applications
- Simplified the Device Setup
- High-end Hardware Configuration

 1920X1200 10.1" Capacitive Screen	 15000mAh Battery	 Communication: Bluetooth/Wi-Fi
 2.0 GHZ 8-core	 64GB Storage	 Camera 2 MP(Front) 8 MP(Rear)

Common Points

Intelligent Diagnosis

Automatically identify vehicle information and check maintenance records online

Remote Diagnosis

Obtain the imminent help from professional technician or Launch experts

Diagnostic Feedback

Provide diagnostic feedback support when you are faced with the problem during the diagnosis

One-click Upgrade

One-click upgrade to update new version of software quickly

Diagnostic Software Clear

Diagnostic Software Clear function to clean up the unnecessary software one time

Extended Modules

Oscilloscope

Sensor

Multimeter

Battery Test

Endoscope

Ignition Analysis
