CNC-603A Injector Cleaner&Tester

MAINTENANCE SERIES

Introduction

CNC-603A is an advanced electromechanical product, which can clean and test injectors by simulating engine working conditions. It also performs cleaning on the injectors and fuel supply system on-vehicle. Three-in-one design includes cabinet, adapter box and cleaning box.

Features

- Cleaning and detecting automatically
- Ultrasonic cleaning
- Uniformity/sprayability test
- The function of sealing test
- Detect the fuel injection
- On-vehicle cleaning

NEW
ARRIVAL

Three in One Design

Integrated design made it more portable, saving more room.

New Plastic Molds

Comparing to the metal material, resin material has good insulation.

New Plastic Tube

It can be protected very well during the transport while the old one applied the glass material
