 - ❑ 5. Final Effect

1. General Description

X-931 non-contact four-wheel aligner is a new high-end four-wheel aligner, It can accurately measure the four-wheel alignment data without any parts contacting the tire or rim. Launch X-931 are adapted to Launch lifts, also adapted to lifts that customers already have in their workshops.

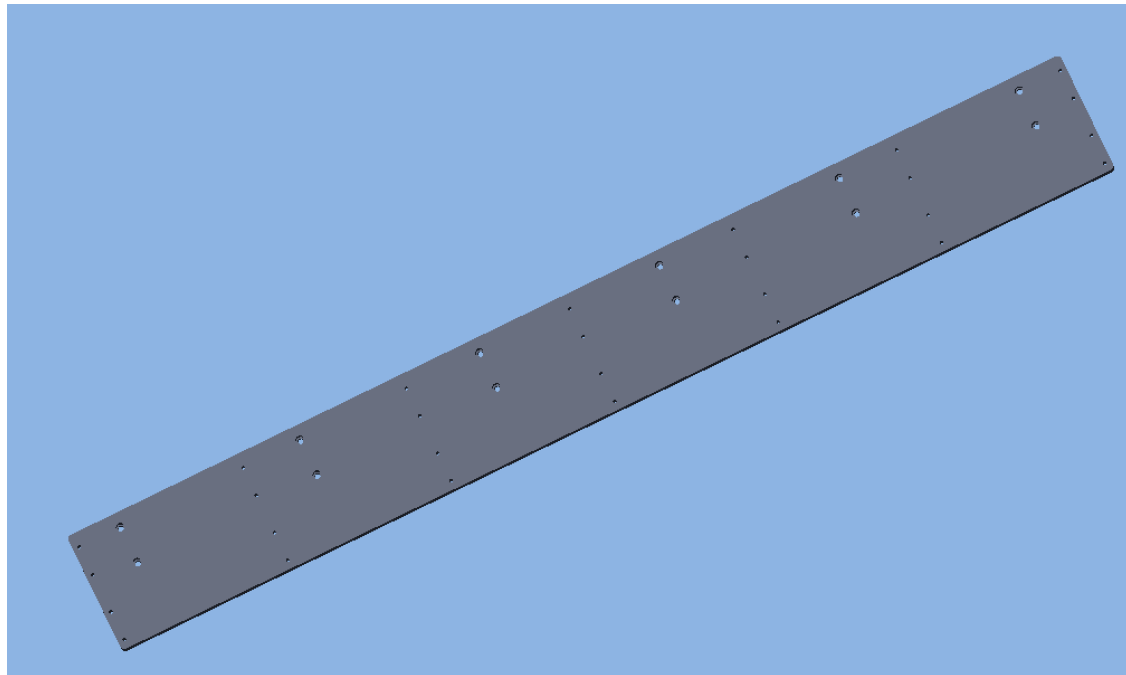

X-931 non-contact four-wheel aligner is basically compatible with all kinds of brand models of four pillar lift, large scissor lifts and ultra-thin large scissor lifts in the market.

2. Product Configuration List

ERP code	Configuration Name	Remarks
302010441	X-931 non-contact four-wheel aligner overseas standard configuration	4t standard slide rail
302010442	X-931 non-contact four-wheel aligner domestic standard configuration	4t standard slide rail
302010443	X-931 non-contact four-wheel aligner overseas Simplified configuration	4t standard slide rail
302010445	X-931 non-contact four-wheel aligner overseas American standard configuration(without Lifts)	4t standard slide rail
302010446	X-931 non-contact four-wheel aligner domestic 5.5t long slide rail configuration(without Lifts), 220V	5.5t long slide rail
302010447	X-931 non-contact four-wheel aligner overseas 5.5t long slide rail configuration(without Lifts), 220V	5.5t long slide rail
302010448	X-931 non-contact four-wheel aligner overseas 5.5t long slide rail configuration(without Lifts), 110V	5.5t long slide rail
302010449	X-931 non-contact four-wheel aligner calibration bar(with battery version)	

3. Overplate

ERP code	Spare Part Name
206010720	X-931 non-contact four-wheel aligner 4t standard over plate (optional spare part)
206010721	X-931 non-contact four-wheel aligner 5t over plate (optional spare part)

4. Solution of X-931 Installed on Different Lifts

No.	Lifts Classification	Instruction
1	Launch 4t 4-post Lifts	Adapted 4t standard slide rail X-931, don't need overplate
2	Launch 3t/3.5t large scissor lifts	Adapted 4t standard slide rail X-931, don't need overplate
3	Launch 4t ultra-thin large scissor lifts	Adapted 4t standard slide rail X-931, need overplate
4	Launch 5.5t 4-post lifts	Adapted 5t long slide rail X-931, don't need overplate
5	third-party 4t lifts	Adapted 4t standard slide rail X-931, need overplate, need customer provide field data
6	third-party 5.5t lifts	Adapted 5.5t long slide rail X-931, need overplate, need customer provide field data

5. Final Effect

1) X-931 installed on Launch 4-post lift final effect

5. Final Effect

2) X-931 installed on large scissor lifts final effect

5. Final Effect

3) X-931 installed on ultra-thin large scissor lift final effect
