

Industrial Heavyduty Vacuum Machine

Specially designed to meet the requirements of the industrial and car washing field. Highly efficient suction power, silent running and effective filtering are the salient features of the machine.

To remove any kind of dirt, superficial or more resistant, solid industrial waste, food particles, wooden particles, etc, can be easily sucked up by the heavy duty vacuum pump with effective filtering and long lasting life.

Special Design for Ducted Provisions to confirm Suction force of 3 inlets simultaneously.

Features:

- 1) Air and other medium of delivery are free of oil particles.
- 2) Silent operation with effective damping for vibration.
- 3) Steady vacuum and air supply.
- 4) Easily removable filtering system.
- 5) Easy operation and maintenance free (oil free)

Specification	
Model	EWIVM450
Protection grade	IP 44
Max. Flow rate	530 m/h
Static vacuum pressure	340~400 Bar
Tank Capacity	500 Liter
RPM	2900
Motor power	7.5kw, 10Hp
Power supply	380/50Hz, 3~
