

ARC WELDING MACHINE - ARC200D

DaTo ARC200D inverts 50/60Hz power supply into high frequency high voltage power supply (up to 43-50 KHz or above), through a high power device IGBT, and then after step-down rectifying and pulse width modulation(PWM) technology, output high power DC supply for welding.

Parameters

Model	ARC-160D	ARC-200D
Parameters	Value	
Rated Input Voltage	1PH-AC220V±15% 50/60Hz	
Rated Capacity	7.1kVA	9.4kVA
Output Current Range	20A~160A	20A~200A
Open Circuit Voltage	62V	
Efficiency	≥85%	
Package Dimension	42x180x360mm	445x180x360mm
N.W	4.1Kg	4.6Kg
