

ASOD2090B OIL DRAINER SERIES

DaTo ASOD series is a very handy Oil Extractor/Drainer which removes oil by draining it through a funnel from overhead, or extracting it through a vacuum pump using a suction hose or three flexible plastic/copper probe adapters. The flexible probe adapters make removing the oil from small openings such as the dipstick an easy task, while the long hose and nozzle allow for even quicker extraction. Disposing of the waste oil could not be easier by attaching an air supply to the pressurized tank.

Functions

- Pneumatic Modular cylinder
- (Enhanced density, More reliable material, max. working Temperature 120°C Special structure reduces leakage problem)
- Vacuum generator
- Smart design, 30% higher efficiency than, other brands
- Suction speed
- 39%.73% higher than, other brands
- Anti-explosion Valve

Specifications

Model	ASOD2090B
Suction Speed @Probe dia. Ø8 and Oil 60°C (max)	6.5L/m US 1.72Gallon/m
Modular Cylinder Capacity Practicable/total	11/12L(2.9/3.2Gallon)
Collection Bowl Capacity	20L/5.3 US Gallon
N/G Weight	42 - 47Kgs
Package Dimension	550x445x1460 mm
Tank Capacity	75L/20US Gallon
Air Inlet Pressure	6~8bar/87~116psi
Air Inlet Connection	1/4"
Vacuum Degree	-1~0bar
Air Pressure for oil Discharge	0.7~1bar/10~15psi
Oil Temperature Range	40~60°C
