12" WHEEL DOLLY GALVANIZED AND ALUMINIUM

DaTo 12" Wheel Dolly Galvanized and Aluminum is ideal for moving the vehicle within the garage, workshop, bodywork, hangar, car driveway to, or where the space to maneuver is reduced this positioner is recommended. Easy and intuitive to use in moving the vehicle, it is sufficient to place the two rollers of the positioner alongside one of the driving wheels of the car and operate the hydraulic manual pedal control. Simply repeat the same operation for the opposite wheel with another positioner. Made of steel and powder-coated, they guarantee excellent resistance over time, with two positioners allowing 180° rotation of the car, while with 4 positioners they allow the car to rotate 360°. It is suitable for tires with a width of approximately 305 mm and the locking pins prevent unintentional lowering of the wheel..

Applications and Functions

- DaTo Wheel Dolly is brand new tool designed for all sorts of operations.
- You will use it in very short time consumption for many operations, such as change your car tires, moving a vehicle, etc.
- It's no need to use other tools as wheel dolly widely used in many areas, including vehicle workshop, car service shop, auto tool shop, car maintenance shop, and garage.
- DaTo Wheel Dolly is allow a single person to move cars, trucks and ATV's around the repair facility with ultimate flexibility.
