

## DBT301 - BATTERY ANALYZER

Model No : **DBT301**

The DaTo DBT series of battery analyzer uses the modern technology in battery testing which can test all 12V starting battery: either Wet(flooded), VRLA or Maintenance Free (MF), Sealed Maintenance Free (SMF), Absorption Glass Mat(AGM) and GEL cell in less than 7 seconds. Results are repeatable and does not drain the battery during testing. Testing can be done on the battery whether it is on or off the vehicle while engine is OFF.

### Functions

- 1. Battery Test -12V (Good/Recharge/Replace, Volt, CCA, mOhm, Life %)
- 2. Grounding Test - 12V
- 3. Starter Test - 12/24V
- 4. Alternator Test - 12/24V (Normal or Smart Alternator) + Diode Ripple

### Specifications

Operating voltage	36V DC (Max)
Battery Analysing time	Less than 8 sec
Memory	Stored up to 48 Test results
Printer head	Thermos Print head
DC Volt accuracy	+/- 2 % reading
PC Connection	Through USB Port
Paper size	40.0 X 56.5 X 0.5mm
Safety	Built in reverse polarity protection
