

## DTK201 - SENSOR / ECU TEST AID KIT

Model No : **DTK201**

This Sensor / ECU Test Aid comprises of various set of wired terminals and connectors ready for connection. It is very useful for the auto electrician to gather, capture data and signal during testing of sensors and simulating of voltages and resistance during diagnosing of the car ECU.

### Some typical applications

- For repair and diagnosis of sensors and ECU.
- For easy measurement and testing of injectors pulse.
- For simulation of voltage and resistance signals
- For Airbag or SRS imitation
