

WEADM260 - ALUMINIUM DENT PULLING MACHINE

Model No : WEADM260

WEADM -260 is an advanced Aluminum dent pulling machine from DaTo with industry leading technology. It come with advanced welding Technology are specially designed for Aluminum panel repairs of BMW, Mercedes Benz, Audi and Volvo. It is also suitable for other metal such as steel copper and iron. It also equipped with the quick repair method which won't damage the paint surface and while save the time and cost. Which can repair the minor collisions on the car body, after confirming the elastic deformation of the car body. It is safe and quick repair option without disassembling any components.

Features

- It has leading international inverter technology. Microprocessor control system and optimizes the parameters. Due to adoption of the advanced digital control technology and user friendly design.
- It has Higher Precision power control unit. Suitable for dent pulling of aluminum and different kinds of steels.
- High welding Strength which help to dent without damage to metallic coating and Paint surfaces on back.
- It was equipped with the Digital display, simple to operate and easy to use.
- Able to 3-8 mm Aluminum Stud Bolts, steel stud bolts and Aluminum washers.

Specifications

| Parameters | WEADM260 |
|--------------------------|--------------|
| | 220v |
| Rated power | 3KVA |
| Fuse | 4A |
| Insulation Grade | H |
| Capacitance | 66000UF |
| Inverter | IGBT |
| No-Load Voltage | 50-150V |
| Spot Table Stud Diameter | |
| Duty Cycle | 80% |
| Welding Mode | Dent Pulling |
| Packing Size | 53x60x164cm |
| Weight | 12/20Kg |

DaTo

"The Legendary leader of Automotive Equipments"

Accessories

- Welding gun
- Pneumatic Vacuum cupule
- Pulling hammer with hook
- Manual Cupule
- Polishing Machine
- Cross bar Lifter 4 Stand and 2 stand
- Hooker for cross bar lifter
- Dent Repair Glue Pulling Kit
- Tools Box
- Plier , Wrench and Screw Driver
